MONICA PM

Data Analyst

Email: monicaphutane2216@gmail.com| Bengaluru, Karnataka, India | Phone: 7411350710

GitHub: https://github.com/Monica-Phutane

Summary

Entry-level Data Analyst with internship experience in data science and machine learning. Proficient in data cleaning, exploratory analysis, visualization, and predictive modeling using Python. Completed end-to-end projects in classification, regression, forecasting, and business intelligence. Strong analytical and problem-solving skills, eager to support data-driven decision-making and grow within the IT industry.

Experience

Data Science Intern, Saiket Systems | Bangalore July 2025 - August 2025

- Analysed large datasets and performed data cleaning, preprocessing, and feature engineering.
- Built predictive ML models using Scikit-learn to support decision-making.
- Designed data visualization dashboards in Power BI and Matplotlib for reporting.
- Collaborated with the team to deliver insights on real-world datasets.

Education

Masters of Science (Data Science & Data Analytics)
Jain University, Bangalore June 2024 June 2026

Bachelor of Science (PCM)
Bishop Cotton's Women's Christian College, Bangalore June 2020 - June 2023

ICBIO Mahesh PU College
PCMB-(Physics, Chemistry, Mathematics, Biology) July 2018 – March 2020

Ramanashree Udaya Education Society (R) April 2018
10th

Projects

Detecting marine pollutants and sea surface features with deep learning Research Project

Conducted analysis of water samples and global case studies to assess ecological & health risks. Proposed sustainable solutions to reduce marine contamination. Applied data analysis & visualization techniques for research insights. Model used RBM (restricted Boltzmann machine).

Predictive Modeling of SBI Stock Trends with Deep Learning Techniques

Developed a Stock Market Prediction model for SBI stock prices using machine learning techniques. Collected and pre-processed historical stock data using Python (Pandas, NumPy). Performed data visualization and trend analysis using Matplotlib and Seaborn. Built and trained LSTM (Long Short-Term Memory) neural network to forecast stock prices. Evaluated model performance using metrics like RMSE and R^2 score. Implemented time-series forecasting and compared predictions with actual stock values.

Skills

- Python (Pandas, NumPy, Pytorch, TensorFlow, Matplotlib, Seaborn)
- Artificial Intelligence (AI)
- Machine Learning and Deep Learning
- ETL
- SQL ,MongoDB
- Power BI & Tableau
- Data Visualization
- NLP and Computer Vision
- SAS
- Gen AI
- Time Series Analysis

Certification

- Python full stack development — pentagon space
- Data Visualization — infosys springboard
- Microsoft Excel for Data Analyst — infosys springboard

Strength

- Quick learner
- Self Motivated
- Adaptive

Declaration

I hereby declare that the above mentioned information is true to the best of my knowledge.

Place: Bengaluru
